

PASİFİK TEKNOLOJİ

“Teknolojiyi Tasarlar”

Advancing with the Vision of Shaping the Future

We embarked on our journey in 1986 with the establishment of our first major venture — a tea factory.

We expanded by stepping into the real estate sector and diversified our investments across various industries, including technology, energy, logistics, and mining.

In 2023, we unified all our companies under the umbrella of Pasifik Holding, continuing our journey towards new horizons.

**PASIFIK
HOLDING**

Growing with the Vision of Shaping the Future

Today, as Pasifik, we continue to move forward with the vision of shaping the future across every sector we operate in.

Our group includes Orçay, the first publicly listed company in the tea industry; Pasifik REIT (Pasifik GYO), which has introduced landmark Next Level projects to its region; Pasifik Eurasia, Turkey's only international railway logistics company; and Pasifik Technology, the producer of Turkey's first and only unmanned helicopter developed with indigenous and national technology.

Additionally, Pasifik Energy contributes to a sustainable future through renewable energy production.

With 55 companies, more than 2,500 employees, four publicly traded companies, and a strong capital structure, we are proud to shape the future in every field we engage.

PASİFİK

Founded in 1986 in the Güneysu district of Rize Province in the Eastern Black Sea Region, Orçay is the First and only company in the Sector that is traded on Stock Exchange and is managed by the 3rd generation.

PASİFİKGYO

Our real estate investment company, which continues to grow with innovative and nature-friendly projects, signing iconic buildings by focusing on design, quality, and investment value while achieving firsts in the real estate sector, and bringing innovative and pioneering projects to the regions it operates in under the Next Level brand

PASİFİK EURASIA

Turkey's only international railway logistic's company and the first railway operator (DTO) in the international transportation sector.

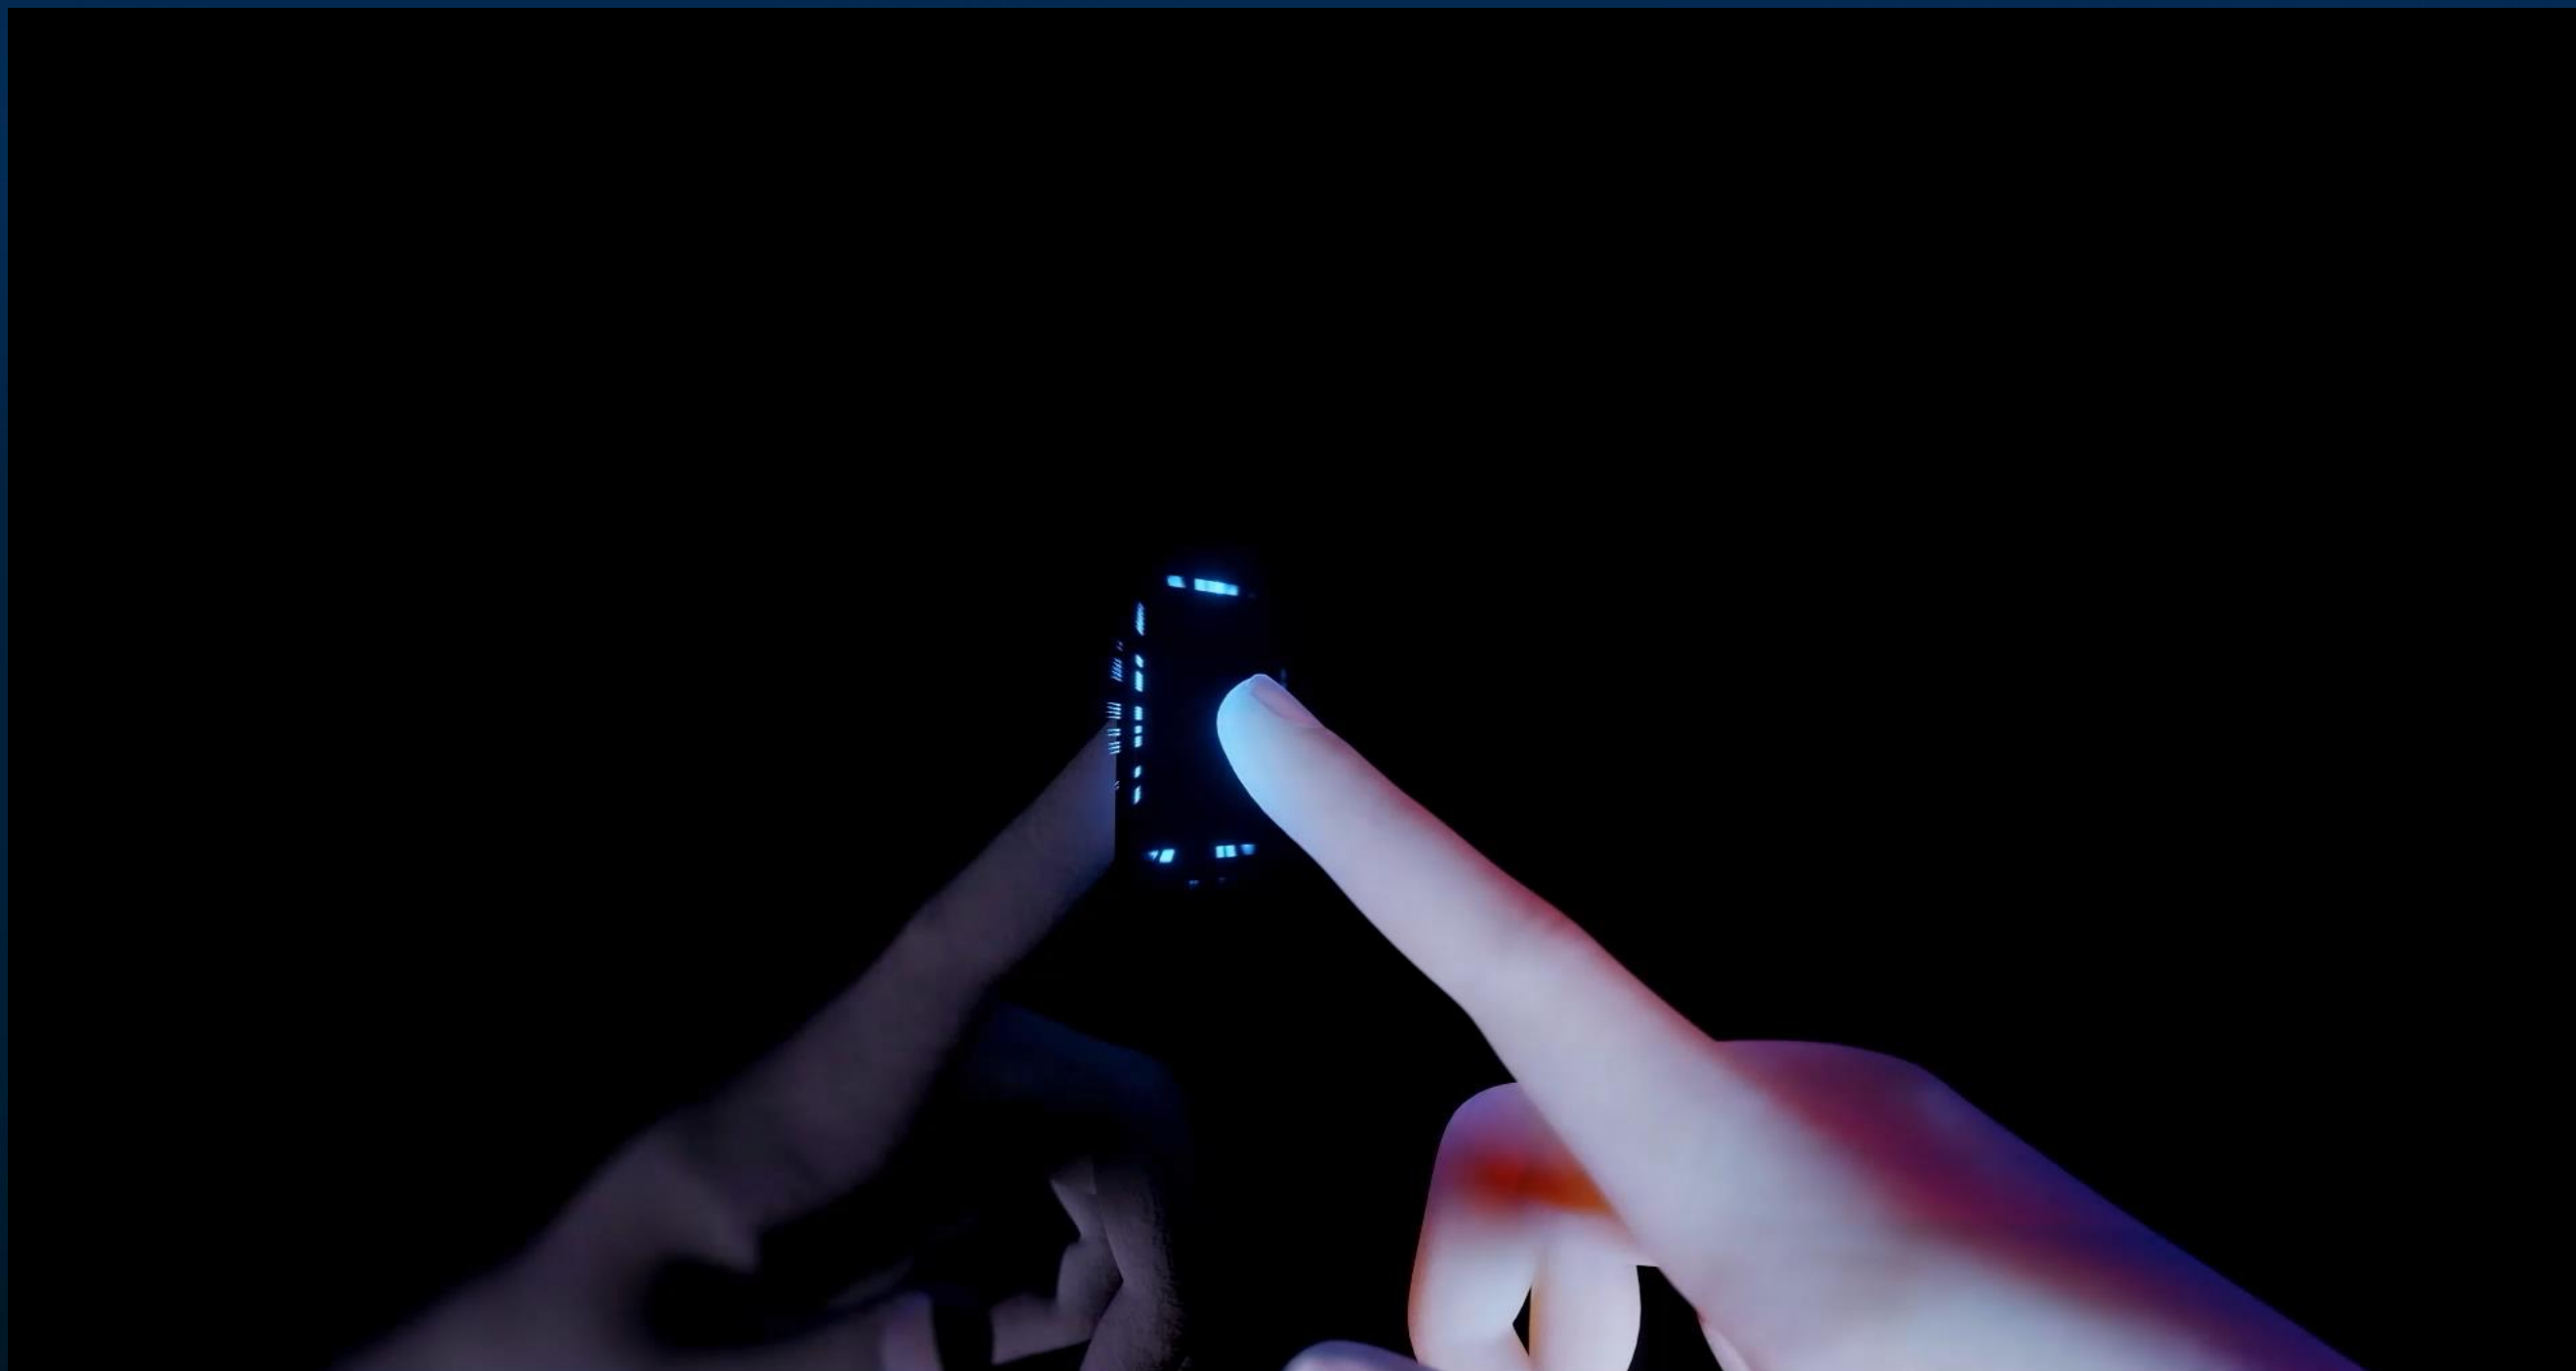

PASİFİK TEKNOLOJİ

Our technology company, which operates with the vision of "designing technology" in all the fields it operates, from defense industry to information technologies, with the goal of developing 100% local and national technologies, and has developed Turkey's first and only indigenous unmanned helicopter in defense technologies.

PASİFİKENERJİ

The energy group aims to increase the share of green energy in their total installed capacity of 175 MW to over 80%. By recycling waste forest products and reintroducing them into the economy, they produce renewable energy pellets as an alternative to fossil fuels. In the mining sector, with its expert team, the group aims to explore and evaluate our country's natural resources and contribute to the economy.

PASİFİK HOLDİNG

PASİFİK TEKNOLOJİ

As a technology and R&D company located in the Information Valley Technopark, Pasifik Teknoloji, with its subsidiaries Titra, Proline, Destel, Ditravo, iCredible, and Destel Connect, offers end-to-end high-value solutions to our customers in various fields, from defense industry technologies to information technologies. We demonstrate our strong vision and innovative perspective at every step, from design to production. In 2024, Pasifik Teknoloji, listed on BIST under the ticker #PATEK, continues to grow with its strong capital structure.

INFORMATION
TECHNOLOGIES

SOFTWARE R&D

Biometric Technologies and Hardware

Our company Proline develops innovative software and hardware products in the fields of biometric solutions and secure documents.

- Population and Citizenship Affairs
3-in-1 Project
- Fingerprint, vein recognition, and facial recognition technologies
- Identity Authentication Systems
- Electronic chip integration of the Turkish ID card, passport, and driver's license.
- Active solutions in international projects such as Istanbul Airport and Doha city security.

www.pro-line.com.tr

Travel Technologies

Ditravo develops innovative software that enhances operational efficiency in the transportation sector.

- Ticketing systems for TCDD via mobile, web, ticket office, and terminal.
- A capacity of 4 million ticketing transactions per month.
- Personalized numbering, dynamic pricing, integrated loyalty solutions.
- Systems adaptable to different modes of transportation, such as air and road.

Blockchain Technologies

iCredible develops innovative and secure solutions with blockchain technology.

- SPK-compliant cryptocurrency asset custody solutions.
- Cryptocurrency exchange solutions.
- Digital assets custody services.
- Tokenization and NFT marketplace products.
- Portfolio management applications.
- Blockchain-based data encryption solutions for endpoint security.
- Risk reduction with a fragmented product storage system.

CYBER SECURITY

Destel Bilişim is a leading technology company that provides next-generation cybersecurity solutions.

- System integration and process management.
- End-to-end secure system architectures for over 200 companies.
- Integration with over 20 manufacturing companies.
- Consulting and engineering services.
- Security operations center and network operations management.
- Strategic partnerships with global companies such as Fortinet, Cisco, and Splunk.
